

LLL-1

650nm Semiconductor Laser

- *In classic style*
- *Wavelength: 650nm*
- *Class IIIa, IIIb*
- *All metal construction*
- *Different output power available*

650 nm Semiconductor laser is widely used in geometric optics, interference, diffraction and polarization experiment.

Available in all black, grey, silver and black with gold trim finish.

Removal or attempt to remove the FDA sticker, dropping the pointer, scratches, or any attempt to disassemble the pointer will void the warranty.
